

SCHÖNES WETTER!

TFA®

INFRARED-THERMOMETER

31.1133.01 INFRARED-THERMOMETER for smartphones

Parents know this from bitter experience. If a child is unwell, temperature measurement is sometimes difficult.

Defy the fever measuring stress

With the infrared sensor, the forehead must be targeted only - ideal for temperature measurement for children and the whole family. This measurement method is **safe and hygienic**, and can even be done while sleeping. Operation is quick and easy.

Portable temperature measuring in the household, work and hobby

Just insert the small probe into the headphone socket of your smartphone or tablet, download the **free app** and start measuring! The mobile infrared thermometer from TFA Dostmann accurately measures the surface temperature in seconds.

- **Measurement results in seconds**
- **Readings by speech output**
- **Store measured values as a graph**
- **E-mail or text notification of measurement results**
- **Small, handy and perfect for travelling**
- **For Google Android (Version 3.0 or later) or Apple iPhone or iPad (iOS 4.3 or later)**
